INDEX

A

ABDOMINAL operations, preliminary administration of morphine and atropine, before (Blomfield, quoted)....96, 97
—— surgery, value of omnopon-scopolamine in....56, 160
Abstracts 112, 150
Acetone, determination of, in expired air, value of, in anæsthesia (P. H. Lorham, abstract)....112
Acetyl-chlorine, production of, inhibition of....57
—— —— —— peristalsis dependent upon....57
Adrenalin-chloroform type, syncope of (H. Hermann: abstract)....152
Air, oxygen and ether vapour, electrical ignition of mixtures of (Professor W. M. Thornton: abstract)....73
Airway of patient, non-obstruction of, at all times requisite....11, 12
Alkali or alkaline mixture, administration of seconal associated with...58
Anæsthesia, all, how produced,....42
—— atmospheres, use of inert gases in (G E. Burford: abstract)...112
—— changes in depth of, correlation with peripheral blood-supply changes 85
—— clinical signs of (modified from Guedel's charts) 13, 14
—— correct choice of, a factor in saving life....135
—— deaths under, decrease from, with employment of barbituric acids 101
—— deaths, directly attributed to 105
—— —— under, statistical review of, by Registrar-General (quoted) 101
—— —— —— 1921-1939 (R. Jarman) 100
—— —— —— (bibliography) 106
—— —— —— responsibility for 105
—— deep surgical, stages of, diaphragmatic activity greatest in....47
—— depth of, in patient, student's difficulty in gauging....12
—— —— —— —— student's knowledge of, requisite....11
—— expiratory pause in....68
—— in cardiac surgery (J. K. Hasler)....30
—— in genito-urinary surgery (T. A. B. Harris)....128
—— in relation to the law (H. G. Dodd)....16
—— in war-time (editorial)....125
—— local, use in cases of grave surgical risk....134
—— of all kinds, how produced....42
—— progressive deepening of, accompanied by progressive depression of respiratory centre....51

Anæsthesia, " rag and bottle " methods of, teaching of, why necessary 70
—— signs in 67
—— —— of, ignorance concerning....67
—— stages of 14
—— surgical, change of respiration in....67, 68
—— teaching first by means of closed methods....69
Anæsthetic administration, complete registrar's report on, desirable 105
—— apparatus, complexity of 145
—— —— simplicity in war-time necessary....126
—— cases in which greatest importance attaches to method of administration 140
—— reduction in amount administered due to premedication....45
Anæsthetics, abnormal reactions to (J. L. O. Tilley: abstract)....75
—— clinical teaching of, why rendered difficult....10
—— comparison of types used at three hospitals (1938)....104
—— deaths from, discovery and classification of causes not attempted 100
—— general, how far reliable in cystoscopy....130, 131
—— —— secretion of urine determined by 130
—— improved training in, desirable....105
—— local, intravesical action too transitory....130
—— —— why valueless in posterior urethra....130
—— newer administration of, instruction of student-anæsthetists in...15
—— postgraduate classes in, greatest number desirable....105
—— teaching of (J. V. Human) 67
—— —— —— suggestion for improving....68
—— various clinical types of (L. Christophe: abstract)....153
Anæsthetist, choice of, abuses connected with 18
—— —— —— responsiblity of surgeon for 18
—— possibility of circumstances leading to evasion of responsibility by 19
—— inexpert, possibility of action for damage for employment of...19
—— medical, what constitutes the value of....143
Anæsthetists, expert, should be responsible for new drugs placed on market 106
—— inadequate, grave results of selection of....19
—— portraits of exhibited at 34 Devonshire Street, London, W.....145
—— " whole-time ", appointment of, opposition to by medical members of hospital staff....21
Angina pectoris, cardiac ischæmia associated with....30
—— —— cause of sudden death in....34
Anoxæmia, continued, result of 53
—— existence in presence of well-maintained respiration....53
—— occurrence in anæsthesia, preceded by basal narcosis....52
—— removal, with removal of source of reflex respiratory stimulation 53
Anoxia, effect on respiratory centre....53

Anoxia, grave trouble caused to anæsthetists by....140
—— prevention of, how to ensure....11, 12
—— stagnant, accompanying cardiac decomposition....135
—— —— following cardiac decompensation, fatal results of....138
—— —— reduction of possibility of....140
Asphyxia, special avoidance during cystoscopic examination....131
Association of Anæsthetists: Annual Meeting, Election of Officers and Report of Council....71
Atelectasis, deaths from, in operated cases with high blood-urea before operation....136, 137
Atropine, action in inhibiting secretions....55
—— association with ether convulsions (H. Grantham Dodd)....90
—— —— —— —— (references)....98
—— avoidance before gas-oxygen anæsthesia....55
—— dosage of....97
—— —— formerly smaller than at present....95
—— ether convulsions occurring without use of....158, 159
—— origin of use in premedication....94
—— premedication by, purposes for which first employed....95
—— salts, employment before administration of ether (Buxton: quoted)....97
—— substitution of scopolamine for....55
—— *see also* Morphine and Atropine
Australian Society of Anæsthetists, Executive Committee (1939-40) 144
—— —— —— —— investigation by questionnaire into details of practice by members....111
Avertin, administration in operations for toxic goitre....59
—— —— in prostatectomy cases, St. Peter's Hospital for Stone....132
—— effect on respiration....160
—— use of, in war-time surgery limited....126
—— —— safe procedure in genito-urinary surgery....133
Ayre, Philip: The student anæsthetist....10

B

Barbiturate poisoning, drugs of value in....126
—— suitability as basal narcotic, factors determining....5
Barbiturates, adminstration of, prevention of ventricular fibrillation by....60
—— cardiac depression from (R. L. Johnston: review)....115
—— individual susceptibility to....61
—— injection of, in war-time operations....126
—— intravenous administration....61
—— —— —— effect on blood-pressure....60
—— oral administration, effects variable....57
—— —— —— special uses for....61
—— —— —— where most of value....61

Barbiturates, value in provision of basal narcosis....57
—— venous injection of....57, 58
—— —— —— safety of....58
Barbituric acids, decrease in number of deaths under anæsthesia with employment of....101
Basal anæsthesia, aim of....5
—— —— in cystoscopy....131
—— anæsthetic, new (pentothal acid) (J. S. Horsley)....1
—— narcosis, benefits of....46, 47
—— —— benefits of, summarised....63
—— —— followed by respiratory depression....48
—— —— for tetanus (P. T. O. Farrell: abstract)....36
—— —— injudicious use of....48, 49, 50
—— —— kind of respiration associated with....52
—— —— occurrence of anoxæmia in anæsthesia preceded by....52
—— —— question of responsibility for pulmonary complications....48
—— —— stage in oral administration of pentothal acid....3
—— —— —— in pentothal acid administration....3
—— —— value of barbiturates in provision of....57
—— —— why not entirely successful as descriptive term....45
—— narcotics, more extensive use advocated....98
—— —— influence of, on hæmoglobin saturation (D. Cordier and P. Soulie: abstract)....37
Beck, M. C.: Advantages and diasdvantages of cyclopropane (abstract)....113
Belladonna, tincture of, in treatment of bronchial complications following administration of ether (Buxton, 1909)....96
Blomfield, J.: Preliminary administration of morphine and atropine before "open ether" (quoted)....97
—— —— —— —— in abdominal operations (quoted)....96, 97
Blood, difference in distribution of during anæsthesia with cyclopropane and with ether....89
—— flow in ear of rabbit, changes in, method of determining....84, 89
—— from case of ether convulsions, examination of....84
—— -loss, total, during operation, estimation of....84
—— -pressure fluctuations in, correlation with peripheral blood-supply changes....85
—— —— effect of intravenous administration of barbiturates on....60
—— —— greater fall following administration of spinal analgesia in pregnant women....24
—— —— low, and respiratory embarrassment in spinal anæsthesia, treatment....78
—— supply changes during cyclopropane anæsthesia (W. Neff, J. A. Stiles and R. Michelson)....83
—— —— —— during ether anæsthesia....84
—— —— peripheral changes in....84
—— —— —— in correlation of changes in depths of anæsthesia, and fluctuations in blood-pressure with....85

Blood supply, qualitative method of studying through photo-electric cell 89
—— —— to ear altered by moderate carbon-dioxide excess.....86
Bortone, responsibility for death on the table (quoted).....103
Boston, F. K.: Effects of administration of carbon dioxide in spinal anæsthesia 77, 78
Brain operations, anæsthetic sequence in two cases of death under...104
Breathing exercises, re-educational, as method of reducing incidence of fatal pulmonary embolus.....139
Broad and Organe: Pentothal with nitrous oxide and oxygen (abstract) 75
Bronchial complications following administration of ether, treatment of (Buxton, 1909).....96
Burford, G. E.: The use of inert gases in anæsthesia from atmospheres (abstract) 112
Buxton, Dudley W.: Employment of atropine salts before administration of ether (quoted).....97
—— —— On treatment of bronchial complications following administration of ether (1909; quoted).....96

C

Caird: Preliminary administration of morphine with or without scopolamine (quoted) 96
Calcium, administration of, followed by recovery from ether convulsions 65, 66
—— deficiency, factors in causation of ether convulsions.....66
Cannon, M. H. V.: Criticism of use of word "morphia" (correspondence) 38
Carbon dioxide absorption in cyclopropane anæsthesia.....51, 52
—— —— caution in employment during maintainence period of anæsthesia 55
—— —— chemical control of respiratory centre by.....50
—— —— danger of administration as respiratory stimulant under spinal anæsthetic.....77
—— —— factor in causation of ether convulsions.....66
—— —— indiscriminate use of 54
—— —— moderate excess in altering blood-supply to ear.....86
—— —— over-dose of 54
—— —— —— ill effects 54
—— —— retention, absence in chloroform-anaesthesia 51
Cardiac deaths in cases operated upon at St. Peter's Hospital for Stone.....134, 135
—— depression from barbiturates (R. L. Johnston: abstract).....115
—— ischæmia. *See* Ischæmia, cardiac.
—— surgery. *See* Heart, surgery of

Cardiazol, convulsant action of 4
—— valuable in barbiturate poisoning....126
Cardio-omentopexy, after-treatment of operated patients....33
—— —— causes of death following....34
—— —— maintenance of positive pressure during....32, 33
—— —— method of induction of general anæsthesia in....31
—— —— operative procedure in....31, 32
—— —— supply of oxygen to patient during anæsthesia, under 31, 32, 33
—— —— premedication employed 31
Carotid body, function of....53
—— —— situation of 53
Cartin, S., and H. Feldnan: Vinethene in dentistry (abstract)....35
Cartwright, F. F.: Possible presence of impurity in ether....94
—— —— Vinesthene anæsthetic mixture (abstract)....151
Casual comments 142
Cererbo-spinal fluid and percaine solution, relationship between
—— specific gravities of 155
—— —— in ventricles and cisterna magna; specific gravity compared with that in lumbar region....156
—— —— —— of human beings. Concentration of procaine in, after subarachnoid injection (Koster, Shapiro and Leikensohn: abstract) 74
—— —— —— specific gravity, difference in....117, 118
—— —— —— —— —— variations in 156
Chest, operations on, kind of, under which special form of anæsthesia has been employed....34
Child-bearing period, majority of women dying under anæsthetics during 102
Children, young, premedication in....62
—— —— use of paraldehyde in premedication of....59
Chin reflex, manipulation of 67
Chloroform anæsthesia, absence of carbon-dioxide retention in....51
—— —— kind of respiration characteristic of....51
—— complete cell-poisoning effected by....42
—— large proportion of deaths under anæsthesia occurring with use of 102
—— precipitating fatal cardiac failure in toxic subject....136 137
—— replaced by "gas-oxygen" in case of war-time patients, with drop in mortality 125
—— volatile but non-irritating nature of....51
—— why abandoned in favour of ether....102
—— why ether has been substituted for....102
—— and ether, administration of, continued with ether, two deaths under 104
—— —— —— great increase of deaths under use of....102
—— —— —— mixtures, decline in use of at one leading teaching hospital of London....102

Christophe, L.: Clinical experience of various anæsthetics (abstract) 153
Cholecystectomy, death of woman undergoing, in anæsthetic sequence of pentothal, percain, gas and oxygen....104
Colon, perforated carcinoma of, operation under gas and oxygen anæsthesia; death following operation....104
Convulsions. *See* Ether convulsions; Pentothal acid, anti-convulsant action
Coramine in war-time surgery....126
Cordier, D. and P. Soulie: The influence of certain basal narcotics on haemoglobin saturation (abstract)....37
Coronary artery, thrombosis of, causing sudden death in angina pectoris 34
—— —— —— thrombosis of, fatal, in operated case....138, 139
Correspondence....36, 77, 117, 155
Cotton: Effect of excess of carbon dioxide on vaso-constrictor paralysis (quoted) 23
Courcy, J. L. de: Spinal anæsthesia, regulation of height with fractional doses (abstract) 153
Cullen, S. and E. A. Rovenstine: Sodium thio-ethamyl anæsthesia (abstract) 36
Cyclopropane, administration of, technique....85, 86
—— advantages and disadvantages of (M. C. Beck: abstract)....113
—— anæsthesia, blood-supply changes during (W. Neff, J. A. Stiles, and R. Michelson) 83
—— —— carbon-dioxide absorption in....51, 52
—— —— current output of photo-electric cell varying with depth of 88
—— —— constancy of kidney volume during any one plane of 88
—— —— deepening of, effect upon kidney volume....88
—— —— excessive hæmorrhage during surgical operations said to be due to....83
—— —— normal reaction of photo-electric cell to changes in....87
—— —— respiration characteristic of 52
—— and ether, differences in distribution of blood during anæsthesia with, respectively....89
—— ether, and spinal anæsthesia, comparison between (J. C. Houston: abstract) 113
—— present status of (abstract) 150
—— with addition of free oxygen, how far suitable in war surgery 126, 127
Cystoscopy, adoption of low spinal anæsthesia for, at St. Peter's Hospital 131
—— basal anæsthesia in 131
—— employment of evipan in....132
—— general anæsthetic in, how far reliable....130, 131
—— possibility of performance without anæsthesia....129, 130
—— special avoidance of asphyxia during 131
—— surgical necessity of anæsthetic for, how arising....130

D

Dawkins, C. J. M. Series of cases described by, compared with seven cases operated on at St. Peter's Hospital for Stone...128, 129
Deaths following administration of various types of anæsthetics; investigation demanded in South Africa.....101
—— from anæsthetics, discovery and classification not attempted...100
—— under anæsthesia; age distribution according to sex.....102
—— —— —— bibliography 106
—— —— —— classifications in series of 1300 detailed cases.....104
—— —— —— decrease from, with employment of barbituric acids 101
—— —— —— geographical distribution in England.....105
—— —— —— responsibility for 105
—— —— —— statistical review of, by Registrar-General (quoted) 101
Dénier, A: "Electro-narcoses" (abstract) 114
Dentistry, vinethene in (H. Feldnan and S. Cartin: abstract).....35
Diaphragm, activity of, greatest in stages of deep surgical anæsthesia 47
—— —— of, less acute in premedicated patients.....47
De Lee: Danger of spinal analgesia in pregnancy and labour.....22
Diploma in Anæsthetics (editorial).....81
—— —— recipients without examination.....28, 109, 141
—— —— recipients by examination 72
Diplomas. *See* Specialist diplomas.
Dodd, H. Grantham: Anæsthesia and the law.....16
—— —— criticism on the association of atropine with ether convulsions (E. Falkner Hill).....90, 158
—— —— report on examination of blood from case of ether convulsions 93
Drugs, new, expert anæsthetists should be responsible for.....106
Dural sac, natural, how differing from artificial model.....117
Dyspnœa, resulting in heart failure 135

E

Ear of rabbit, method of determining changes in blood-flow.....84, 89
Editorials: Anæsthesia in war-time.....125
—— Diploma in anæsthetics.....81
Electrical ignition of mixtures of ether vapour, air and oxygen (Professor W. M. Thornton: abstract).....73
Electro-narcosis (A Dénier: abstract) 114
Emboli, pulmonary, attempts at operation for.....30
Emotional disturbance in patient causing rise in rate of basal metabolism 44
—— —— —— —— effect on basal metabolism 44
—— —— —— —— eliminated by premedication 44

Emotional disturbance, pre-operative, in patient causing hyper-activity of supra-renal glands....46
—— elevation of metabolic rate....59, 60
End-organs in lungs, stimulation of....50
England, geographical distribution of deaths under anæsthesia in...105
Ether, administration of, employment of atropine salts before (Buxton: quoted) 97
—— —— treatment of bronchial complications following (Buxton, 1909) 96
—— amount of, required during performance of cardio-omento-pexy 33, 34
—— anæsthesia, blood-supply changes during....84
—— —— constancy of kidney volume during any one plane of....88
—— —— decrease in photo-electric cell current output with....88
—— —— deepening of effect upon kidney volume....88
—— —— kind of respiration characteristic of....51, 52
—— —— premedication before 45
—— —— safety of, probable cause....51
—— and cyclopropane, differences in distribution of blood during anæsthesia with, respectively 89
—— complete cell-poisoning effected by....42
—— contra-indicated in operations for toxic goitre 62
—— convulsions (M. D. Nosworthy and others)....74
—— —— ætiological factors discussed....92, 93
—— —— association of atropine with (H. Grantham Dodd)....90
—— —— —— —— references 98
—— —— case of (W. D. Steel)....64
—— —— —— —— after performance of total hysterectomy; recovery 64
—— —— case-history of 90, 91, 92
—— —— case of, recovery after administration of calcium....65, 66
—— —— criticism (E. Falkner Hill)....158
—— —— dates of first cases of....93, 94
—— —— examination of blood from case of....93
—— —— factors in causation of 66
—— —— occurring without use of atropine or ether....158, 159
—— —— search for exciting cause of....94
—— —— successful treatment by evipan....90
—— former method of administration by use of mask....95
—— impurity in, possible presence of....94
—— "open" administration of, demand for....10, 11
—— —— administration of, instruction of student anæsthetists in...15
—— —— anæsthesia, dosage of omnopon-scopolamine before....60
—— —— preliminary administration of morphine and atropine before (Blomfield: quoted) 97
—— spinal and cyclopropane anæsthesia, comparison between (J. C. Houston: abstract) 13

Ether vapour, air and oxygen, electrical ignition of mixtures of (Professor W. M. Thornton: abstract)....73
—— why substituted for chloroform....102
Etherington-Wilson technique in spinal analgesia....22
—— —— —— administration of light percaine by....155
—— —— —— criticism of (C. Langton Hewer)....117
—— —— —— upon what based....117
Ethyl-chloride-ether sequence, method of administration in operation of cardio-omentopexy....31
Ethylene anæsthesia, excessive hæmorrhage during surgical operation stated to be due to....83
Evipan, intravenous injection in small doses....61
—— successful treatment of ether convulsions by....90
—— when possible of employment in cystoscopy....132
—— sodium; psychological investigation by means of (E. Stungo: abstract)....73
Expired air, determination of acetone in, its value in anæsthesia (P. H. Lorham: abstract)....112
Expiratory pause in anæsthesia....68

F

Fagge and Pye-Smith: *Textbook of Medicine*, good literary presentation of....146
Farrell, P. T. O.: Basal narcosis for tetanus (abstract)....36
Feldnan, H., and S. Cartin: Vinethene in dentistry (abstract)....35

—— in relation to production of post-operative peristalsis.....56
—— value in operations for toxic goitre.....60
—— and atropine, preliminary administration before abdominal operation (Blomfield: quoted).....96, 97
—— —— preliminary administration before "open" ether (Blomfield: quoted).....97

N

Neff, W., J. A. Stiles, and R. Michelson: Blood-supply changes during cyclopropane anæsthesia.....83
Nembutal, effects of, discussed.....58, 59
—— oral premedication with, results.....8
Nervous system, central, reflex irritability in pregnancy.....23, 24
Nitrous-oxide alone, use of in operation for toxic goitre.....61, 62
—— —— anæsthesia, requirement for success in.....44
—— —— and oxygen with pentothal (Organe and Broad: abstract) 75
—— —— —— *see also* Gas oxygen anæsthesia.
—— —— gas, administration in the chair (400,000) total absence of death.....104
—— —— —— and oxygen, administration in case of perforated carcinoma of colon; death following operation.....104
—— —— —— —— replacing chloroform in war-time patients, with drop in mortality.....125
—— —— increase in percentage used for anæsthesia, along with lowering of patient's oxygen requirement.....43
—— —— oxygen anæsthesia, avoidance of atropine before.....55
—— —— —— —— dosage of omnopon scopolamine before.....60
—— —— —— —— effect of non-irritating nature of.....51
—— —— —— —— effect of partial re-breathing employed in.....51
—— —— —— —— minimum requirement of oxygen in.....43
—— —— —— —— value of premedication in.....43
—— —— oxygen replacement by diffusion of gases effected by.....42
—— —— supreme safety of, when endangered.....44, 45
—— —— why less dangerous to patient than volatile anæsthetics...43
—— —— without ether, administration in cases of toxic goitre.....61
Nosworthy, M. D., and others. Ether convulsions (abstract).....74
Nurse-anæsthetists, unsuitability of.....143
—— —— abolition of employment of.....142

O

Obstetrics, operative, hæmorrhage from uterus in, how affected by anæsthetics 84
Omnopon, effect upon metabolism 59
—— value in operation for toxic goitre 60
—— scopolamine, dosage before open-ether and nitrous-oxide oxygen anæsthesia respectively 60
—— —— effect on respiration 60
—— —— premedication with, under spinal anæsthesia in genito-urinary surgery 133
—— —— sedative action of 56
—— —— value in abdominal surgery 56, 60
Operating table, question of responsibility for death on 103
—— theatres, requisite equipment of 103, 104
Operations, total blood-loss during, estimation of 84
Organe and Broad: Pentothal with nitrous-oxide and oxygen (abstract) 75
Osler, Sir W.: *Textbook of Medicine*, good literary presentation of ... 146
Oxygen, administration with reduction or cessation of respiratory activity 53
—— air and ether vapour, electrical ignition of, mixtures of (Professor W. M. Thornton: abstract) 73
—— content, intracellular, temporary reduction of, producing anæsthesia 42
—— minimum requirements in nitrous-oxide anæsthesia, importance of 43
—— requirement of patient, lowering of, with increase in percentage of nitrous oxide 43
—— supply of during anæsthesia under performance of cardio-omentopexy 31, 32, 33
—— —— —— to patient during cardio-omentopexy 31, 32, 33
—— and nitrous oxide with pentothal (Organe and Broad: abstract) 75

P

Paraldehyde, preliminary administration of 98
—— rectal, premedication with in operation for tonsils and adenoids 62
—— use in premedication of young children 59
—— value as basal narcotic 59
Paralysis, vaso-constrictor, under spinal analgesia 23
Paralytic ileus. *See* Ileus.
Patient, premedication from point of view of 41, 42
Payne, R. T.: Extensive thrombosis after injection of pentothal sodium (abstract) 154
Pentothal, formula of 1
—— with nitrous oxide and oxygen (Organe and Broad: abstract) ... 75

Pentothal acid, action on man....3
—— —— administration of, effect on epileptics....4, 5
—— —— animal investigations with....2
—— —— anti-convulsant action....4
—— —— clinical use of....5, 6
—— —— comparison with other barbiturates....8
—— —— minimal hypnotic and minimal lethal dose in animals....2
—— —— new basal anæsthetic (J. S. Horsley)....1
—— —— oral administration as basal anæsthetic....6
—— —— —— —— stages of....3
—— —— pharmacology of....2
—— —— pre-anæsthetic administration in larger doses, results....6
—— —— —— —— in divided doses, results....7
—— —— qualities of....2
—— —— solutions of....2
—— —— summary....9
—— —— toxicity of....4
—— percaine, gas and oxygen, death of woman undergoing cholecystectomy in anæsthetic sequence of....104
—— sodium, completion of pentothal acid anæsthesia with, results....7
—— —— intravenous administration in small doses....61
—— —— extensive thrombosis after injection of (R. T. Payne: abstract)....154
—— —— intravenous injection at last minute....61
—— —— oral administration dosage....8
—— —— —— —— rapidity of action....8
—— —— oral premedication with, results....8
—— —— qualities of....2
—— —— value as intravenous and oral anæsthetic compared....1
—— —— and pentothal acid, main difference between....2
Percaine, light, administration by Etherington-Wilson technique....155
—— solution, light, injection of, under Trendelenburg position..156, 157
—— —— and cerebro-spinal fluid, relation between specific gravities of....155
—— specific gravity fixed....155
Peristalsis dependent on production of acetyl-chorine in bowel-wall...57
—— post-operative morphine in relation to production of....56
Photo-electric cell current output, decrease upon induction with ether anæsthesia....88
—— —— —— current output preceding impending surgical shock...87
—— —— —— —— varying with depth of cyclopropane anæsthesia....88
—— —— —— difference in current output of, determining peripheral blood-supply changes....85
—— —— —— normal reaction to changes in cyclopropane anæsthesia....87
—— —— qualitative method of studying blood-supply changes....89

Photo-electric cell, use of, in measuring changes in opacity in determination of changes in blood-flow in ear....84
Pictoxin, valuable in barbiturate poisoning....126
Positive pressure, maintenance during operation of cardio-omentopexy 32, 33
Post-anæsthetic stage in oral administration of pentothal acid....4
Postgraduate classes in anæsthetics, greater number desirable....105
Pratt, Dr. Freda, appointment to....141
Pre-anæsthetic medication, drugs used for....5
Pregnancy, administration of spinal analgesia in, followed by greater fall of blood-pressure....24
—— as a contra-indication to spinal analgesia (F .B. Mallinson)....22
—— ectopic, ruptured, case of, death under spinal analgesia...25, 26, 27
—— reflex irritability of nervous system in....23, 24
Pregnant patients, " rachi-sensitiveness " to spinal analgesia in....27
—— as a contra-indication to spinal analgesia (references)....27
Premedicated patients, diaphragmatic activity less acute in....47
Premedication, advantageous to patient, anæsthetist and surgeon 46, 47
—— adequate and suitable, must precede gas-oxygen anæsthesia....44
—— before ether anæsthesia....45
—— by atropine, purposes for which first employed....95
—— controlling effect on basal metabolism....44, 45
—— emotional disturbance in patient eliminated by....44
—— enabling exploitation of advantages of modern methods of anæsthesia 42
—— in nitrous oxide oxygen anæsthesia....43
—— in young children....62
—— one principal benefit from 42
—— origin of use of atropine in....94
—— physiological effects of drugs used for....59
—— rectal forms of 59
—— reduction in amount of anæsthetic administered, due to....45
—— sedative, advantages of....41
—— —— from point of view of patient....41, 42
Prolyn-Williams: Preliminary administration of morphine and atropine before ether given by " open " method (quoted)....96
Procaine, concentration of, in cerebro-spinal fluid in human beings after subarachnoid injection (Koster, Shapiro and Leikensohn: abstract) 74
Prostatectomy cases, administration of avertin in, St. Peter's Hospital for Stone 132
—— operations for, 1933-38, with and without avertin, deaths and mortality rate 133
Prostatic period, majority of men dying under anæsthetics during...102
Pulmonary complications, question of responsibility of basal narcosis for 48
—— embolism, fatal, in eleven operated cases....138, 139

Pulmonary incidence in cases operated on in St. Peter's Hospital for Stone 128
—— —— —— method of reducing incidence of 139
Pulse-rate, increase in, when occurring under spinal analgesia 24
Psychological investigation by means of evipan sodium (E. Stungo: abstract) 73
Pulmonary deaths in cases operated upon at St. Peter's Hospital for Stone 134, 135

R

Rabbit, ear of, changes in blood-flow, method of determining 84, 89
Rachi-sensitiveness to spinal analgesia in pregnant patients 27
Rectal forms of premedication 59
Reflex mechanism, second main factor in control of respiratory
Registrar's report, complete on anæsthetic administration, desirability for 105
Registrar-General, statistical report of deaths under anæsthesia (quoted) 101
Respiration, change of, in surgical anæsthesia 67, 68
—— characteristic of cyclopropane anæsthesia 52
—— depressed, associated with basal narcosis 52
—— how affected by administration of barbiturates 60
—— —— —— by omnopon, scopolamine and avertin 60
—— in chloroform and ether anæsthesia contrasted 51
—— well-maintained, existence of anoxæmia in presence of 53
Respiratory activity, normal factors upon which dependent 50
—— —— reduction or cessation of, under administration of oxygen 53
—— centre, chemical control of 50
—— —— effect of anoxia on 53
—— —— first main factor in respiratory activity 50
—— —— progressive depression, with progressive deepening of anæsthesia 51
—— depression following basal narcosis 48
—— —— —— —— —— when only dangerous 49
—— embarrassment in spinal anæsthesia, treatment 78
—— rhythm, cause of 50
—— stimulant, danger of administration of carbon dioxide as, under spinal anæsthetic 77
—— stimulation reflex, with removal of anoxæmia 53
